Versatility

The NuSource 3 Speed Carpet Dryer is a perfect choice for any type of carpet or floor drying situation. It dries floors and carpeted areas...FAST! The low speed is designed for use in areas such as offices where paper and other items might be affected. The unit can be switched to medium speed to dry areas that are under constant foot traffic. Use the highest speed for really quick drying of an area that is unoccupied.

Lighweight and stackable

A NuSource blower fan weighs in at 31 lbs and carries a one year warranty. Intake and exhaust covers provide protection and safety from dirt, debris and fingers. A molded cord wrap is conveniently located at the top for cord storage. A molded polyethylene shelf is perfect for holding the stackable NU3CD.
