Warranty:	3 year warranty
Includes:	10' x 1.5" vacuum hose Chrome plated telescoping wand 11" floor & rug tool Upholstery tool Dusting tool Crevis tool
Options:	HEPA filter lit

Specifications

The NuSource Piccolo dry canister vacuum incorporates all the power of most upright vacuums without utilizing a brush assembly. The low (61 dba) noise output is ideal in areas where minimal sound levels are required, such as nursing homes, clinics and hospitals. A stable base with 2 stationary and 2 swiveling rubberized casters make the Piccolo track straight behind the operator.

Filtration

A triple filter system and optional HEPA rated filter keeps the air around you fresh. The dual-layered disposable paper bag functions as the primary filter and collects the majority of the recovered debris. The standard cartridge filter will filter any 'dirty air' that passes through the bag while the exhaust filter collects any residue from the carbon brushes on the vacuum motor. The optional HEPA micro filter is tested to HEPA standards of 99.97% efficiency at .03 microns.
