Active Dust Management

An active dust management system picks up and contains pad fibers, fractured floor finish and dust. A battery powered vacuum mounted into the rear of the machine actually picks up debris and deposits it into a disposable vacuum bag.

Adjustable Head Pressure

Pad pressure is controlled by an actuator that has 3 settings for light, medium and heavy burnishing. The electronic control of the head pressure setting is extremely effective on irregular or uneven floors and when more aggressive pads are used.

- Excellent all around visibility
