Performance

The NuSource Slider dual motor vacuum is designed for true one-pass cleaning. Dual motor vacuums can deliver twice the results: one motor supplies power to the brush while a separate vacuum motor maintains maximum suction at all times. Both motor are built to UL standards and are warranted for a full year. The slider's clean air vacuum system draws soil through a vacuum hose and drops it directly into the vacuum bag. Damaged impellers are a thing of the past since no soil or debris travels near the motor. The vacuum motor is protected by a secondary filter that ensures all soil is trapped before air is drawn through the vacuum motor. The spiral brush design offer exceptional performance results ensuring maximum soil recovery. Features like a bag full indicator light, slide out/in brush strips, large 1.6 gallon bag capacity and on-board tools make the Slider a real time saver.

Functional

The Slider is an ideal vacuum for cleaning in tight congested areas or wide open spaces, a balanced design offers comfort and ease of use. A four (4) position brush height adjustment will maximize your vacuum performance weather you are vacuuming short commercial carpet or a walk-off mat. The Slider is designed and engineered for heavy daily use, day in and day out.
