Easy to use

The NuSource spotter is designed for carpet spotting and upholstery cleaning. It features a large 3 gallon solution and recovery tank with an automatic float shut off in the recovery tank. The NuSource spotter incorporates performance features typically found in larger machines. The clear hand tool allows for monitoring of the recovered solution and cleaning material. The integrated, retractable transport handle and shock absorbing wheels allow the unit to roll from location to location.

Effective

The NuSource spotter enables cleaning and treating of spills and spots from carpet and upholstery. The sooner you treat the spot by using the appropriate chemical and extraction procedure the more successful you will be in its permanent removal. Spots and spills require treatment on a timely basis to prevent permanent setting of the stain, damage to carpet fiber or the potential re-soiling of improperly cleaned areas.
