### Features

The NuSource Stripper Applicator will save time, money and effort on your next stripping procedure. The innovative design of the stripper applicator allows one person to apply stripping solution quickly and effectively. The tank will hold up to 22 gallons of pre-diluted stripping solution and the polyethylene body carries a full 12 year warranty. Maximum achievable coverage rate is 30,000 square feet per hour.

### Operation

After the area has been prepared, simply fill the tank with stripper solution, open the conveniently located valve at the rear of the machine and pull it backwards. A consistent layer of stripping solution is then distributed evenly and spread with a replaceable nylon bristle strip. Clean up is easily accomplished by simply flushing out the tank and lines with water, removing and cleaning the applicator head of the unit.
